

This effort to control the airwaves by big government bootlicking corporations will not go unnoticed by the voting public. Perhaps because it is known the I.Q. of the average American is only 100, they assume we the public need only be fed the moronic morsels they feel will boost their ratings, or will line their pockets with government cash. The voting public know what you are trying to do and you will pay with your comfy pandering political positions. You prostitute the first amendment and we will not forget this or who you are come election day. It is unbelievable how fast this country is circling the drain.
